

PERSONAL TRAINERS

Achieve and exceed your health and fitness goals with the support and guidance of one of our nationally Certified Personal Trainers (CPT). Our CPTs will create a safe and effective exercise program customized for your personal health and fitness goals. At Central YMCA we believe that being healthy and being fit is a lifestyle and a journey and we are here to help you every step of the way. Whether your goal is to lose weight, build core strength, run a marathon or to simply live healthier, our CPTs will help you get there.

OUR FOUR STEP APPROACH

Assessment: Your Certified Personal Trainer will assess the following areas: exercise history, static posture, functional movement patterns, and your goals/barriers.

Program Design: We'll take the information from your assessment to design a specialized program that works with your lifestyle, schedule, needs and goals.

Program Instruction: We'll guide you through your personalized program. Every step of the way we will emphasize safety, proper form and technique. Personal instruction provides motivation and accountability. This will lead to meeting and exceeding your fitness goals.

Re-assessment Progression: A re-evaluation is recommended every 4-6 weeks. At that time, we'll design a follow-up program to address your new abilities, goals, and needs. We are committed to helping you achieve your goals within your parameters.
